EDUCATION

Jain College Of Engineering, Belagavi 2023 – 2027
B.E. in Computer Science and Engineering CGPA: 8.4
Bangur Nagar Junior College 2022
Pre-University Course (PUC) 89%
Janata Vidhyalaya, Dandeli 2020
SSLC 94%

EXPERIENCE

Future Interns Dec 2025 – Jan 2026
Full Stack Development Intern

- Developed responsive full-stack applications using React.js, Node.js, Express.js, MongoDB, and SQL.
- Built responsive user interfaces and integrated REST APIs for frontend-backend communication.
- Developed and deployed a portfolio website, focusing on responsive design and application performance.
- Debugged application issues and improved database connectivity and overall reliability.

GirlScript Summer of Code (GSSoC) Jun 2026 – Jul 2026
Open Source Contributor

- Contributed code enhancements and UI improvements to open-source projects by resolving issues and submitting GitHub pull requests.
- Collaborated with mentors and contributors through Git workflows, code reviews, and issue tracking to deliver feature enhancements and bug fixes.

PROJECTS

ExoVision AI – AI-Powered Exoplanet Detection
Tech Stack: Python, Machine Learning, Pandas, Scikit-learn, React.js

- Built an AI-powered exoplanet classification platform using Python and Scikit-learn to analyze astronomical datasets and identify potential exoplanet candidates.
- Developed data preprocessing and feature engineering pipelines to improve data quality and support reliable machine learning predictions.
- Evaluated classification performance using accuracy, precision, recall, and F1-score to measure model effectiveness and assess prediction reliability.

Live: ExoVision AI **Source Code:** ExoVision AI

SecureVault – Secure File Locker
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, AES-256, Tailwind CSS

- Developed a full-stack secure file locker using React.js, Node.js, Express.js, and MongoDB, enabling authenticated users to securely upload, manage, and download files.
- Implemented JWT authentication, bcrypt password hashing, and AES-256 encryption to secure user accounts and protect uploaded files from unauthorized access.
- Integrated Cloudinary cloud storage and optimized backend APIs, achieving file upload/download response times of under 2 seconds with a fully responsive user interface.

Live: SecureVault **Source Code:** SecureVault

Weather Advisor
Tech Stack: React.js, Node.js, Express.js, OpenWeather API, Gemini API

- Developed an AI-powered weather platform by integrating OpenWeather API and Gemini AI, delivering real-time forecasts with personalized travel recommendations, packing tips, and safety insights.
- Optimized API integration to provide weather updates in under 2 seconds while ensuring a fully responsive and seamless user experience across desktop and mobile devices.

Live: Weather Advisor **Source Code:** Weather Advisor

SKILLS

Languages: C++, Python, Java, C, JavaScript
Frontend: React.js, HTML, CSS, JavaScript, Tailwind CSS
Backend: Node.js, Express.js, Spring Boot, REST APIs
Databases: SQL, MySQL, MongoDB, Database Design
Cloud & DevOps: AWS, Docker, Linux
Core: DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC
Tools: Git, GitHub, Postman, VS Code, Pandas, NumPy

ACHIEVEMENTS & EXTRACURRICULAR

- Secured First Place in the Ideathon Competition by developing and presenting an innovative technology-driven solution.
- Participated in NASA Space Apps Challenge 2025 and developed ExoVision AI, a machine learning platform for analyzing astronomical data and identifying potential exoplanet candidates.
- Served as Coordinator of the Fine Arts Club, contributing to campus events, creative initiatives, and student-led activities.
